11. London Bridge Road at Dam Neck Road (Cameras Activated August 31, 2009)
12. North Hampton Blvd at Diamond Springs Rd (Cameras Activated October 10, 2009)

Intersections in the Routing Process for VDOT approval:

1. Baxter Road at Independence Blvd (at VDOT)

Notes:

- (1) An engineering safety analysis was conducted at all of the intersections above in accordance with VDOT guidelines. The analysis included a 48-hour automatic traffic recorder directional and classification count, turn movement counts, and a concurrent 12-hour video survey of red light violation counts.
- (2) Each location will receive a 30 day automated enforcement violation warning period that begins the date the camera system is activated. Drivers must be aware that officers will issue summonses for red light violations that occur in their presence.
- (3) Please contact the **PHOTO***Safe* Program Coordinator if you know of a location that would benefit from red light running photo enforcement.
