

FY 2019-2020 Virginia Beach Budget Response to Council Questions

Question Number: FY 20 46

Question: How many measles immunizations have been given?

Date Requested: April 2, 2019

Requested By: Councilmember Henley

Department: Health

Response: In CY 2018, the Virginia Beach Department of Public Health (VBDPH) administered 411 doses of the MMR vaccine. VBDPH has not investigated or reported any confirmed cases of Measles during the period of 1999-2019. The chart below depicts the MMR doses administered by age group.

Doses Administered Report														
District Name	Vaccine Group	Age Group (Years)												Grand T..
		1	2	3	4	5	6-9	10-14	15-18	19-24	25-44	45-64	65+	
VIRGINIA BEACH	MMR	39	10	4	89	76	49	52	44	11	28	8	1	411
	Total	39	10	4	89	76	49	52	44	11	28	8	1	411
Grand Total		39	10	4	89	76	49	52	44	11	28	8	1	411

This report provides a count of all of the immunizations administered at VDH during the reporting quarter by site within district.

- Select your quarter and district from the pull down menus on the right
- All valid VDH immunizations are considered.
- Both brands of HPV are reported together under "HPV" on the report.
- Both brands of MCV4 are reported together under "MCV4" on the report.
- Both brands of MENB are reported together under "MENB" on the report.
- Combination vaccines are listed separately and their components are not included under the individual antigens listed on the report.
- All brands of FLU, HIB and DTAP are reported together under the appropriate antigen. (Ex: FLU-SP, FLU-SPP, FLU-MIST, FLU-PFA, and FLU-PIP are all reported in FLU).
- Flu shots administered under community events are not included in the count unless the event has been marked complete.
