A strong showing of more than 100 Virginia Beach residents attended the first event in the new Sea Level Rise Summer Symposium series held on Wednesday, July 25. The first symposium, “High Winds & Rising Water,” focused on educating residents about sea level rise and flooding. Residents were able to hear from featured speakers Kurt McCoy, a hydrologist for the U.S. Geological Survey, and William Sammler, a warning coordination meteorologist with the National Weather Service. The speakers discussed issues such as tides, precipitation, stormwater, weather patterns and the impacts of hurricanes and flooding on the Southern Rivers Watershed.

The second symposium in the series, “Aquatic and Terrestrial Vegetation,” will feature speakers Brian van Eerden from The Nature Conservancy and Chad Boyce with Game & Inland Fisheries. It will take place on Wednesday, Aug. 22 from 6 to 8 p.m. at the Advanced Technology Center theater (1800 College Crescent, second floor).

WalletHub recently ranked Virginia Beach as the second best large city to live in among the 62 U.S. cities with populations of more than 300,000. Of the 56 key indicators used to rate the cities, Virginia Beach was listed at No. 1 for highest homeownership rate, lowest percent of population living in poverty and lowest crime rate.
