The City of Virginia Beach is where careers serving the community build connections that matter.

Department of Public Works Engineering Opportunities
The City of Virginia Beach Department of Public Works is currently hiring Engineers to fill vacancies across multiple divisions.

Public Works Engineers provide comprehensive engineering support in all areas of civil engineering for the City of Virginia Beach. A staff of more than 100 full-time engineers oversee the delivery of major capital infrastructure projects including design, construction, and environmental initiatives.

Public Works Engineers
City of Virginia Beach Engineers play an important role in maintaining the sustainability of our city. We have several Engineering opportunities available in the following divisions:

**Storm Water Engineering Center**
Manages projects to help prevent major flooding issues within the city and leads our Sea Level Rise initiatives

- manage storm water flood control projects for neighborhoods
- develop storm water master plans
- analyze effects of Sea Level Rise and recurring flooding on city infrastructure

**Storm Water Management Regulatory Division**
Maintains water quality standards for residents and supports the Municipal Separate Storm Sewer System (MS4) Permit

- manage water quality improvement projects
- conduct field investigations
- analyze data through the use of geographic information system tools
- coordinate public outreach and education activities
- provide oversight in pollution prevention and reduction

**Transportation Division**
Delivers roadway projects throughout the city and provides a safer and less congested roadway network for the motoring public

- manage civil engineering related projects that support: transportation, traffic safety, highway expansion, bridges and parks
- in-house design of major transportation projects
Coastal Division
Manages the upkeep and improvement of the city coastline and beaches for residents and tourists
- oversees beach replenishment
- manages neighborhood navigation dredging

Engineering and Construction Management
Oversees construction of major city infrastructure projects including roadways, storm water and city buildings
- develop construction project scopes
- oversee construction and inspections for all new City infrastructure
