

PLANNING AND COMMUNITY DEVELOPMENT

Consultants, Builders and Developers Notice #2017-07-31

July 31, 2017

Topic: Proposed Revision to Public Utilities' Policy on Water and Sanitary Sewer Services for Development

Public Utilities (PU) Administrative Policy ENG 1103 identifies various types of developments and specifies the number of water and sewer connections required for these developments. It also discusses the type of ownership of the water and sewer lines (public or private). The proposed revision provides new definitions and guidance more closely aligned with recent development trends in residential housing in Virginia Beach. It also increases the number of required water and sanitary sewer services for certain residential developments containing one to four dwelling units located on one lot.

Links to the current and proposed policies can be found online at:

www.VBgov.com/ENG1103.

Prior to finalizing the proposed revisions to PU Administrative Policy ENG 1103, Public Utilities would like to extend an opportunity for the development community to review and provide comments.
