Consultants, Builders and Developers Notice #2020-12-28

December 28, 2020

Topic: 2019 VSMP Construction General Permit Update

Beginning, January 1, 2021, older versions of the 2019 Construction General Permit registration statement will no longer be accepted.

On November 25, 2020 a final exempt regulatory update went into effect that impacts requests for Construction General Permit coverage. Any permitted land-disturbing activity that will generate disposal of non-agricultural fill off-site is required to report each off-site area that will be accepting the fill along with the contents of that excavated material. This disclosure is required whether the off-site disposal area is to be covered under the permit coverage requested or another VPDES permit. The Construction General Permit registration statement has been updated to reflect these changes and can be found here [link](#). The new form will be required for projects permitted after January 1, 2021.

The updated regulatory language can be found at the [link](#) or below:

9VAC25-880-50. Registration statement.

"B. Registration statement. The operator shall submit a registration statement to the VSMP authority that contains the following information:

...5. If excavated material (i.e., fill) will be transported off site for disposal, the name and physical location address, when available, of all off-site excavated material disposal areas, including city or county; latitude and longitude in decimal degrees (six digits – ten-thousandths place); and the contents of the excavated material;"
