January 5, 2015

Topic: New and Revised Public Utility Sanitary Sewer Lateral Details

The Department of Public Utilities has created new and revised several sanitary sewer lateral standard details. The details reflect the new sanitary sewer lateral cleanout configuration, and address the placement of tracer wire during installation. The following is a list Public Utilities Standard Details that have been affected by this change:

- **PU Detail No. 10: House Lateral Cleanout**
- **PU Detail No. 11: Typical Lateral Layout**
- **PU Detail No. 11A: Typical Lateral Layout General Notes for CIP Projects (NEW)**
- **PU Detail No. 12: Typical Lateral Layout for Plumber Connections**
- **PU Detail No. 12A: Typical Lateral Layout General Notes (Developer) (NEW)**
- **PU Detail No. 14-1: Vacuum System Connection**
- **PU Detail No. 14-2: Vacuum System Connection**
- **PU Detail No. 14-3: Vacuum System Valve Pit Detail with Tracer Wire (NEW)**
- **PU Detail No. 14-4: Vacuum System Valve Pit Plan View (NEW)**

The new sanitary sewer lateral standard details can be found at this [link](#)

Effective Date: Immediately
