DSC Information Notice #174

January 5, 2011

Topic: Interim Amendment to the Public Works Specifications and Standards Manual for Residential Entrances in the North Beach Area

Background

The Public Works Director recently amended Sections 3.10.4 – 3.10.6 of the Public Works Specifications and Standards Manual. The amendment does not modify or add any requirements for residential entrances. The purpose of the amendment is to make the Manual more user-friendly by referencing all of the residential entrance requirements in one chapter.

Section 3.10.4 was replaced with the residential requirements from Chapter 18 of the Manual that addressed properties located in the 100/200 blocks of 41st Street through 89th Street. The previous Sections 3.10.4 and 3.10.5 were renumbered 3.10.5 and 3.10.6.

Copy of Amended Chapter 3

The link to Chapter 3 of the Public Works Specifications and Standards may be found in the middle of the Public Works home page at www.vbgov.com, under “New in Public Works!”

Effective Date: December 20, 2010
