

City of Virginia Beach
Planning Department
Permits and Inspections Division

Fats, Oils, & Grease (FOG) Requirements:

All new installs of backflow prevention and FOG devices are to be installed in accordance with the Virginia USBC (Uniform Statewide Building Code).

For all such installs contact Mr. Scott Soady (757-385-4211) for guidance.

A plumbing permit which includes a grease trap will not be issued until it goes through the review process and has been approved.

- Cut Sheet of all fixtures, floor drains, kettles and equipment with grease laden waste that will be going into the grease trap.
- Calculations from the International Plumbing Code (IPC) on grease trap sizing or Hampton Roads Calculation sizing
- Cut Sheet of the approved grease trap showing which grease trap will be used.
