First responders shall make notification to supervisory members of any incident where there may be a question to the Departments liability or which may result in heightened community interest. Supervisory personnel shall relay such reports via the chain of command, and/or the Command Duty Officer, to the Office of the Chief of Police.

Procedure for Emergency Notification of Other Agencies (CALEA 41.2.4)

For the purposes of documenting notifications, Patrol Officers investigating incidents that require notification of other emergency, investigative, or social service agencies shall make such notification via the E911 Emergency Communications Division. When notifications are more appropriately made by telephone or some other means, the notification will be documented in the Computer Aided Dispatch System (CADS) Record, the Incident Based Report (PD-18) and /or the appropriate Incident Command System Forms. The information included in the notification when requesting the assistance of another agency should contain a brief description of the incident (i.e., structure fire; grass fire; serious accident with nature and type of injuries; malfunctioning traffic signal; downed power lines; roadway collapse; etc.) so that the requested agency has sufficient information from which to plan their response. Notifications of other agencies may include, but are not limited to, city agencies such as the Fire Department; the Department of Emergency Medical Services (EMS); Department of Social Services; Public Utilities; and the Department of Highways. Outside agencies may include the Virginia Department of Transportation (VDOT), Dominion Virginia Power and Virginia Natural Gas (VNG).
