

ATLANTIC AVENUE RECONFIGURATION 30% DESIGN

The proposed improvements on Atlantic Avenue and Pacific Avenue in front of the Historic Cavalier will include terminating Atlantic Avenue with a cul-de-sac, removal of the existing signal at Pacific and Atlantic, installation of two new signals one at the intersection of Pacific Avenue and 40th Street and the other at the intersection of Atlantic Avenue and 42nd Street. Additionally, left turn lanes will be constructed on Pacific Avenue and 40th Street to improve safety and capacity through the intersection. After these improvements are implemented, northbound traffic on Atlantic Avenue will pass through 40th Street to continue northbound on Atlantic Avenue. Proposed on-street parking will be provided on the east side of Atlantic Avenue between 40th Street and the proposed cul-de-sac.
