

What is the RAMP?

- An extension of the RASAP vision/process with a multimodal plan for the RASAP study area
- A detailed look at challenges and opportunities with short- and long-term actions and strategies
- Aligns different types of mobility (e.g., vehicles, bicyclists, pedestrians, shared mobility, transit, TNCs, parking) in a way that optimizes how people access the Resort Area and move around within it
- Provides concepts for representative portions of key corridors that illustrate changes in support of the mobility optimization

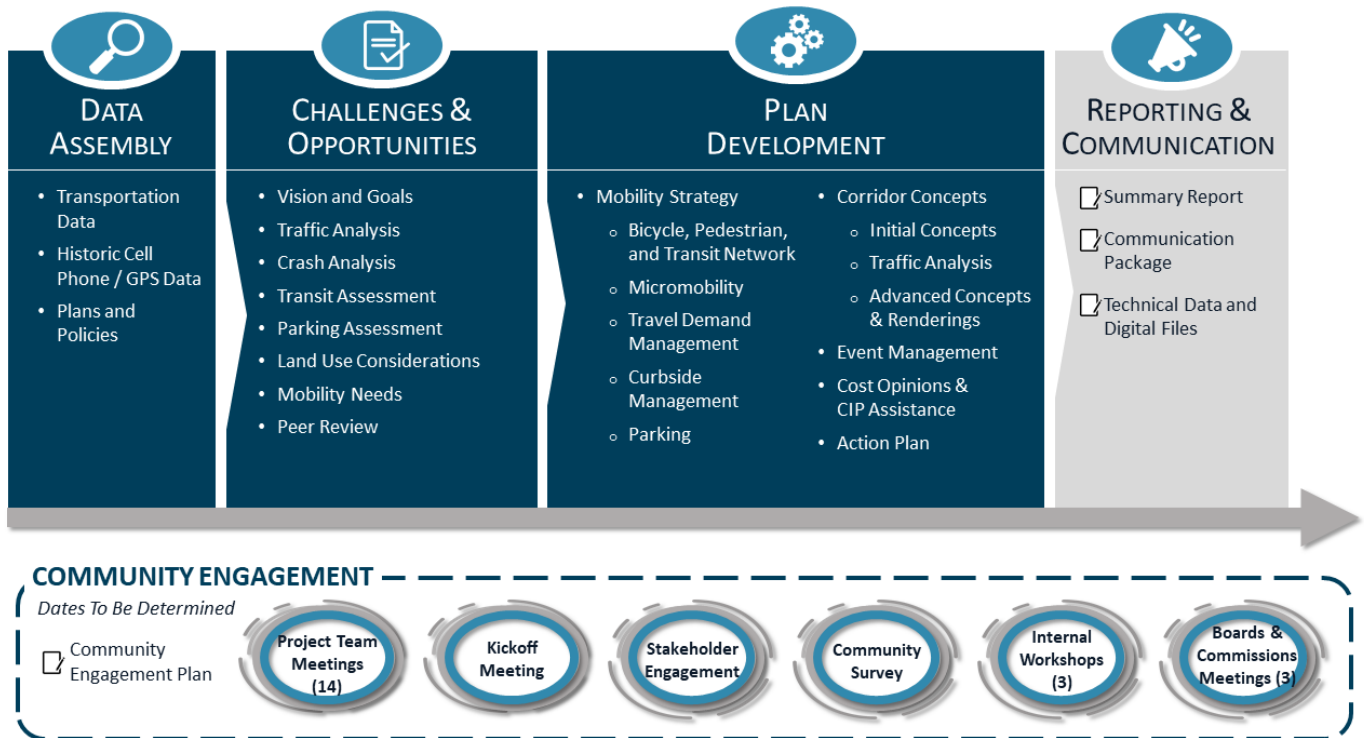

What is the role of the TPPC?

- Primary oversight committee
- Help set vision and goals
- Support engagement activities
- Help vet recommendations

What data will we seek?

- Community and stakeholder input
- Traffic volumes, crash history, transit data, parking inventory/occupancy, bike/ped volumes, micromobility, TNC activity
- StreetLight Data

What is the process?

What is the anticipated schedule?

Data Assembly	Challenges & Opportunities	Plan Development	Reporting & Communication	Data Verification
August – September	September – November	December – February	February	Summer 2021
