Hillard Heintze Invites Virginia Beach Community to Second of Two Open Meeting Discussions on the May 31 Mass Shooting

VIRGINIA BEACH, VIRGINIA – Today, Hillard Heintze announced the location of the second community Listening Session and encourages all Virginia Beach residents with insights or concerns they would like to contribute to the investigation to attend.

In accordance with the intent of the resolution adopted by the Virginia Beach City Council on July 2, 2019 to “safeguard independence and public confidence” during the shooting investigation and Hillard Heintze’s first phase of the engagement, Listen and Learn, the firm will host its second community Listening Session on Thursday, August 8, 2019 at 7 p.m. at the Sandler Center, 201 Market Street, Suite 1, Virginia Beach, Virginia 23462. Residents who cannot attend the Listening Session may contact Hillard Heintze directly by calling (877) 208-5650 or sending an email to VirginiaBeach@HillardHeintze.com.

About Hillard Heintze, a Jensen Hughes Company

Hillard Heintze is one of the leading security risk management teams in the world. We are trusted around the globe to deliver innovative, prevention-oriented advisory solutions that help our clients improve performance and outcomes in protecting what matters: their people, performance, interests and reputation. Since our inception in 2004, more than 85 Fortune-ranked enterprises, 575 U.S. and international brands, and 150 of the world’s most affluent families have gained insight, assurance and confidence through our services – and are better managing security risk. Headquartered in Chicago, we support clients across the globe through six practices: Security Risk Management, Security Design, Threat + Violence Risk Management, Private Client and Family Office Services, Investigations and Law Enforcement Consulting. For more information, visit www.hillardheintze.com.

About Jensen Hughes

Jensen Hughes is a global leader in safety, security and risk-based engineering and consulting. Every day, a team of 1,250+ engineers, consultants and scientists develop and deliver innovative and cost-effective solutions to a global client base involving fire protection systems design and analysis, code consulting, emergency management services, security consulting, forensic engineering, fire research, risk-informed applications, probabilistic risk assessments, development and testing, commissioning and construction services.
